

Figure 1: Overview of the proposed system architecture. The diagram is divided into two main sections: 'System Architecture' (left) and 'Data Flow' (right).

System Architecture:

- Input Data:** Includes 'Input Data 1' and 'Input Data 2'.
- Data Preprocessing:** Includes 'Data Cleaning' and 'Data Normalization'.
- Model Training:** Includes 'Model Selection' and 'Model Training'.
- Model Evaluation:** Includes 'Model Performance' and 'Model Interpretability'.

Data Flow:

- Input Data:** Flows into 'Data Preprocessing'.
- Data Preprocessing:** Flows into 'Model Training'.
- Model Training:** Flows into 'Model Evaluation'.

Data Dictionary:

Variable	Description	Unit
Input Data 1	Input Data 1	Unit 1
Input Data 2	Input Data 2	Unit 2
Model Performance	Model Performance	Unit 3
Model Interpretability	Model Interpretability	Unit 4
